Frontend: React.js, HTML5, CSS3, Tailwind CSS, Vite

Backend & Database: Supabase, PostgreSQL, REST API Integration

Core CS: Data Structures & Algorithms, OOP, DBMS

Development: Responsive Web Design, Component-Based Development, Debugging

CERTIFICATIONS

HackerRank — Frontend Developer (React)

ADDITIONAL STRENGTHS

Creative problem-solving, fast learning, communication, research, analytical thinking, and user-focused product development.

PROJECTS

SRTSync — Subtitle Time-Shift Synchronization Tool

[React.js](#) | [JavaScript](#) | [Tailwind CSS](#) | [Vite](#)

- Built a web-based tool for synchronizing SRT subtitle files with video timing.
- Implemented time shifting, FPS stretching, subtitle validation, live preview, undo/reset, and instant download.
- Developed reusable React components and a responsive interface focused on usability.

EduCertify — Certificate Verification System

[HTML](#) | [CSS](#) | [JavaScript](#) | [QR Code](#)

- Developed a certificate verification platform using unique certificate IDs.
- Implemented certificate validation and QR-code-based access with a responsive interface.

Virtual Classroom

[React.js](#) | [JavaScript](#)

- Developed an interactive virtual classroom interface with navigation and assignment functionality.
- Used reusable React components to create a structured user experience.

Online Feedback Collection System

[C++](#) | [Data Structures & Algorithms](#)

- Developed a C++ application for collecting and managing user feedback.
- Applied data structures and logical problem-solving techniques for data handling.

CAREER FOCUS

Seeking internship opportunities in software development, frontend engineering, digital marketing, growth, content, research, or analytics where I can contribute to a professional team and continue building practical experience.
